Mastering AdCreative.ai: Feature-Driven Guide for Sales

From Idea to Production: Your End-to-End Creative Workflow

How to pitch to our leads the best [AdCreative.ai](https://adcreative.ai) features, and explain to them how they work together to allow them to generate the best content, at scale

Our **Client Ready** features

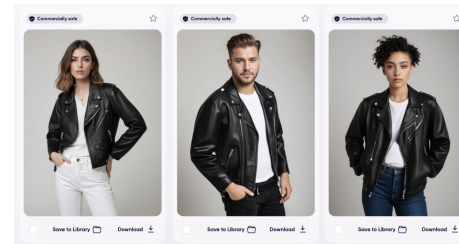

IA Stock Image Generator

Generate your library of quality stock photos with AI.

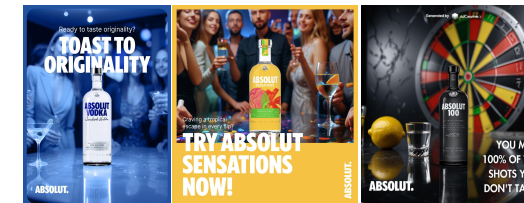

Fashion Photoshoot AI

Design stylish ads tailored for the fashion industry.

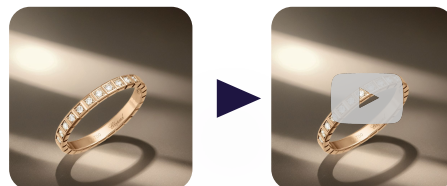

Custom Templates

Customize templates for on-brand batch visuals

Product Video Ads

Transform your Product Photo ads into videos!

Stock Video Generator

Produce high quality video with AI assistance

Product Photo Ads

Create product visuals in a glance

AI Stock Images Generator

Instantly generate **high-res, license-free** visuals tailored to your exact brief, **even from fine-tuned content**.

Stock Images is designed for industries where generic visuals fall short:

Finance, SaaS, Education, Real Estate, Healthcare, and of course, with the fine-tuning, retailers. **These sectors often struggle to find relevant imagery.**

Why it fits these industries:

- ⚡ Instant creation of context-aware, emotion-driven visuals
- 🎯 Matches brand tone and target messaging
- 🚫 Avoids stock photo fatigue: no more using the same images as your competitors

Maximize impact by pairing with:

- **Custom Templates:** add layers, headlines, and CTAs for campaign-ready content
- **AI Stock Video Generator:** animate static ads or build full scenes for videos from generated visuals

⚠️ *Note:* As with all AI-generated content, some visuals may appear synthetic, but the creative speed and control unlock new possibilities for marketing teams.

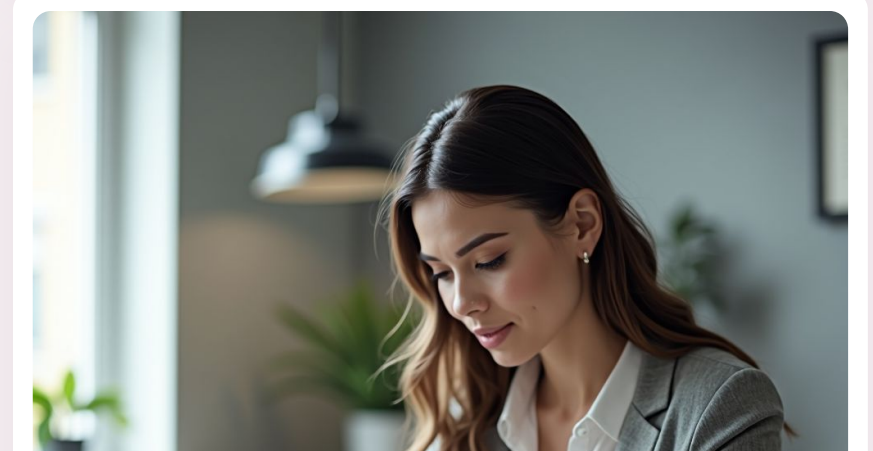

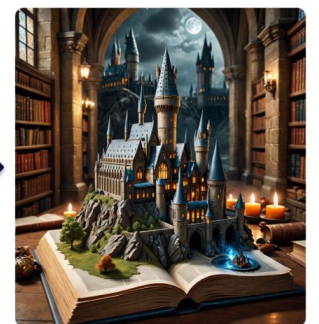

Stock Images

Create unique, commercially-safe and ultra-realistic stock images in any style with a simple prompt

Prompt

Hogwarts School of Witchcraft and Wizardry in an epic setting inside an open book, magical environment, glowing pages, enchanted atmosphere, vivid colors, intricate details.

Fashion Photoshoots

Transform your clothing product shots into high-end fashion visuals with AI-generated models, or fine-tuned models.

Fashion Photoshoot is designed for clothing brands looking to scale visual production.. **Traditional photoshoots are costly** and time-consuming. With this tool, you get **premium visuals** aligned with your brand's aesthetic, **in just minutes and lower prices..**

Why it fits fashion teams:

- ⚡ Instantly generate editorial-quality visuals with styled models
- Faithfully showcases your garments' fit, fabric, and cut
- Keeps visual consistency across all marketing assets

Maximize impact by pairing with:

- **Fine-tuning:** teach the AI your brand's visual identity and product details
- **Style Match:** recreate a reference look or lighting setup
- **Custom Templates:** add campaign text, branding, and CTAs in one click

⚠ *Note:* In some outputs, the garment may appear slightly distorted depending on shape or texture. Without fine-tuning, the model's face may also vary slightly between generations.

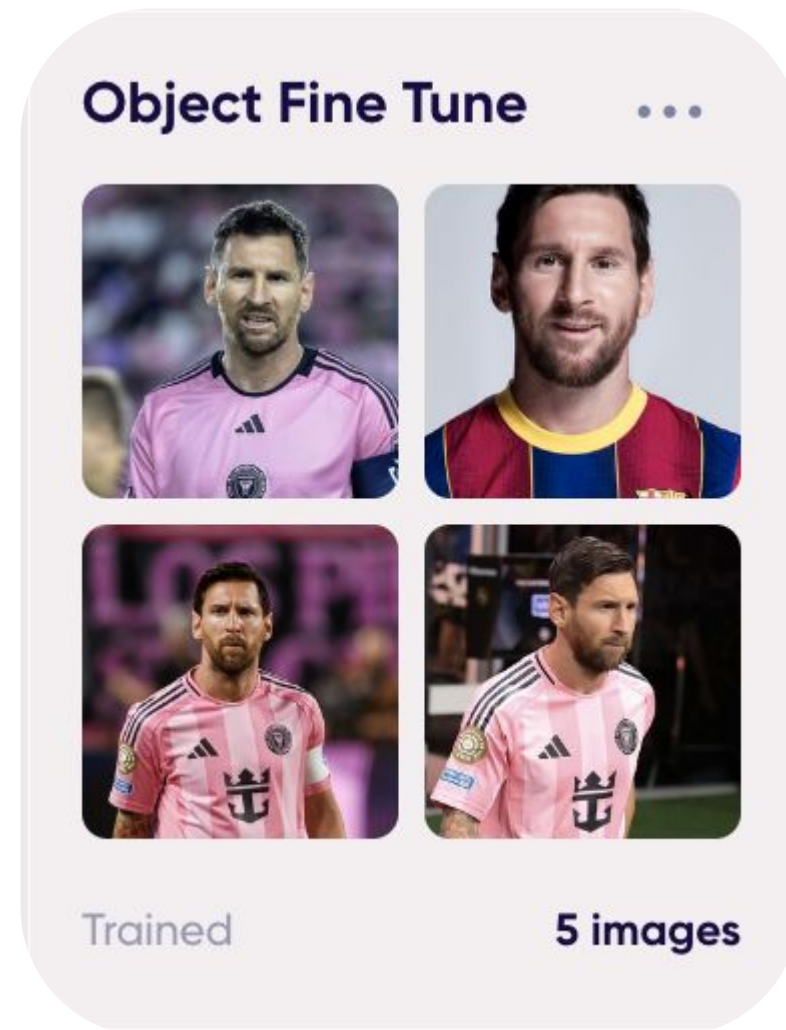

Fashion Photoshoots

Upload your product image to generate fashion shoots fitted on AI-generated models

Fashion Photoshoot

Fashion photoshoots allow you to dress the model in any outfit

Custom Template Builder

Instantly turn AI-generated visuals into ready-to-use marketing assets by adding headlines, CTAs, logos, and brand elements, all directly within the platform.

Custom Templates is built for teams that need to scale branded creatives fast, without relying on external designers or juggling multiple tools.

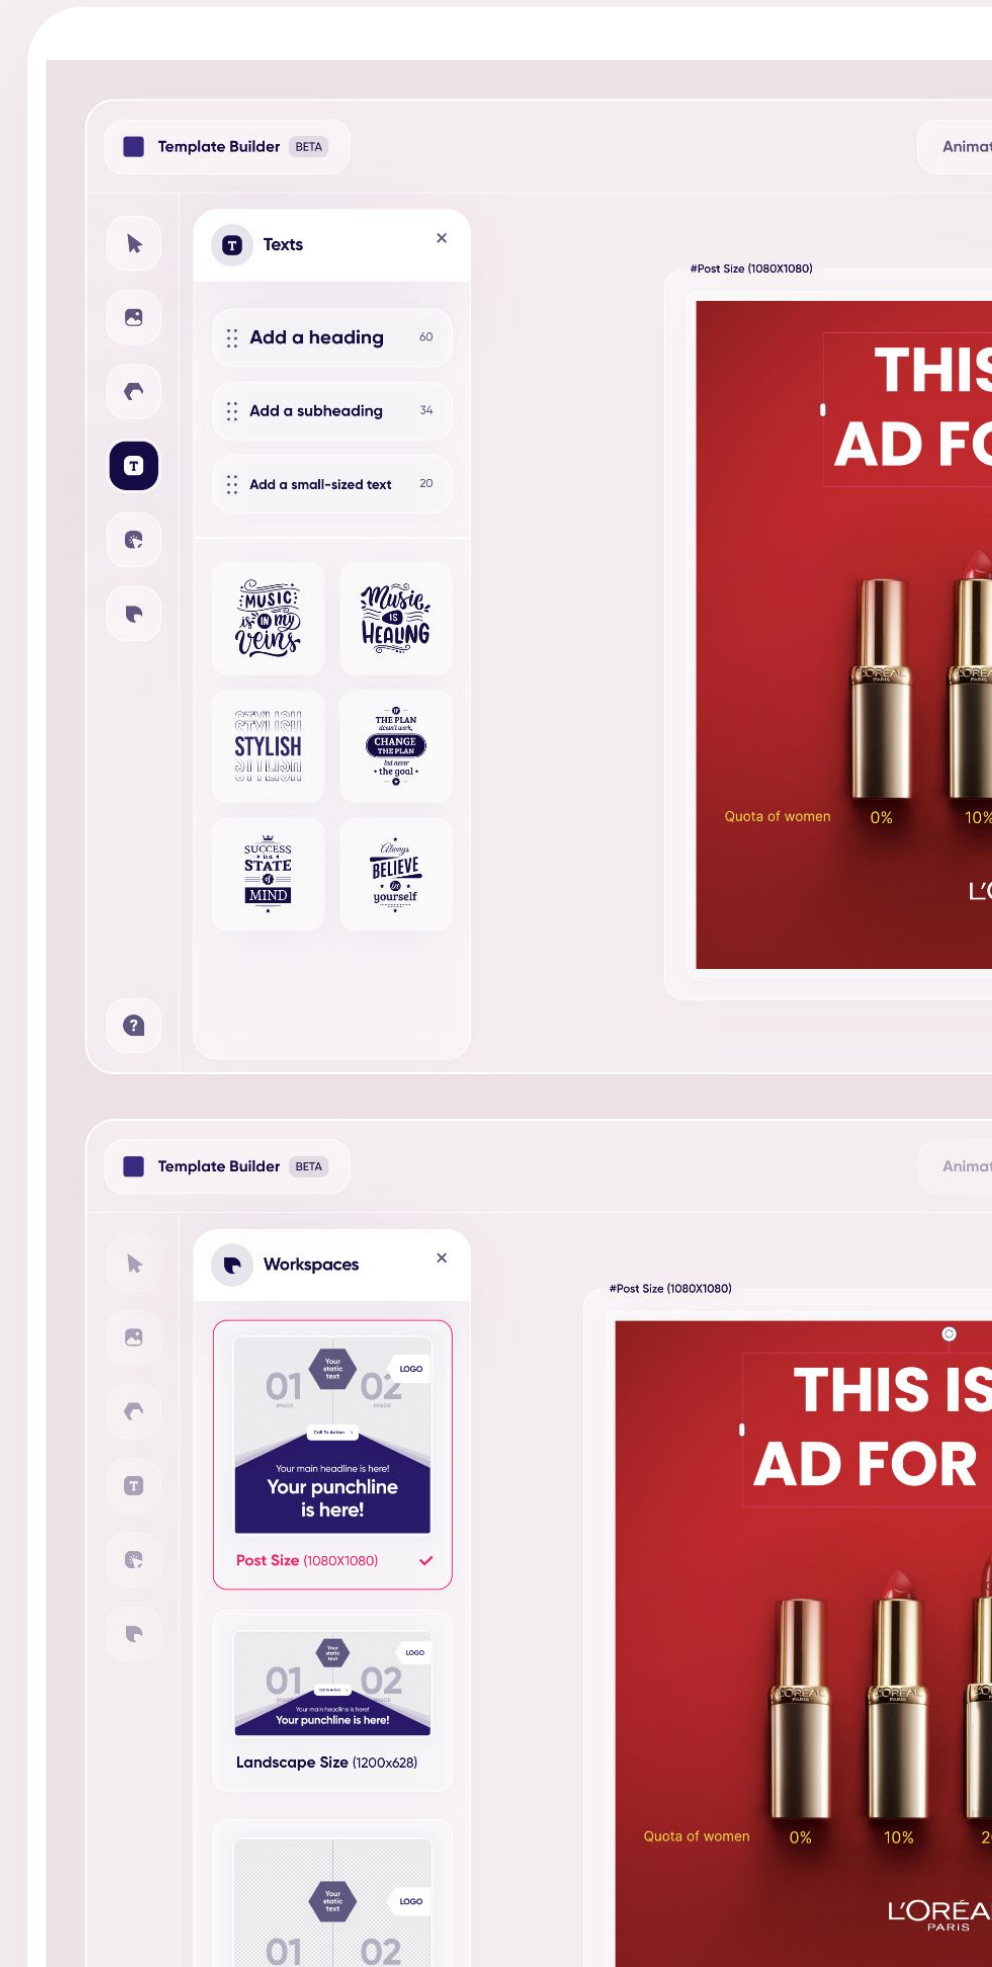

Why it fits performance and creative teams:

- Add headlines, pricing, badges, logos — instantly
- Keep a consistent layout across campaigns
- Align visuals with product launches, promos, or seasonal moments

Maximize impact by pairing with:

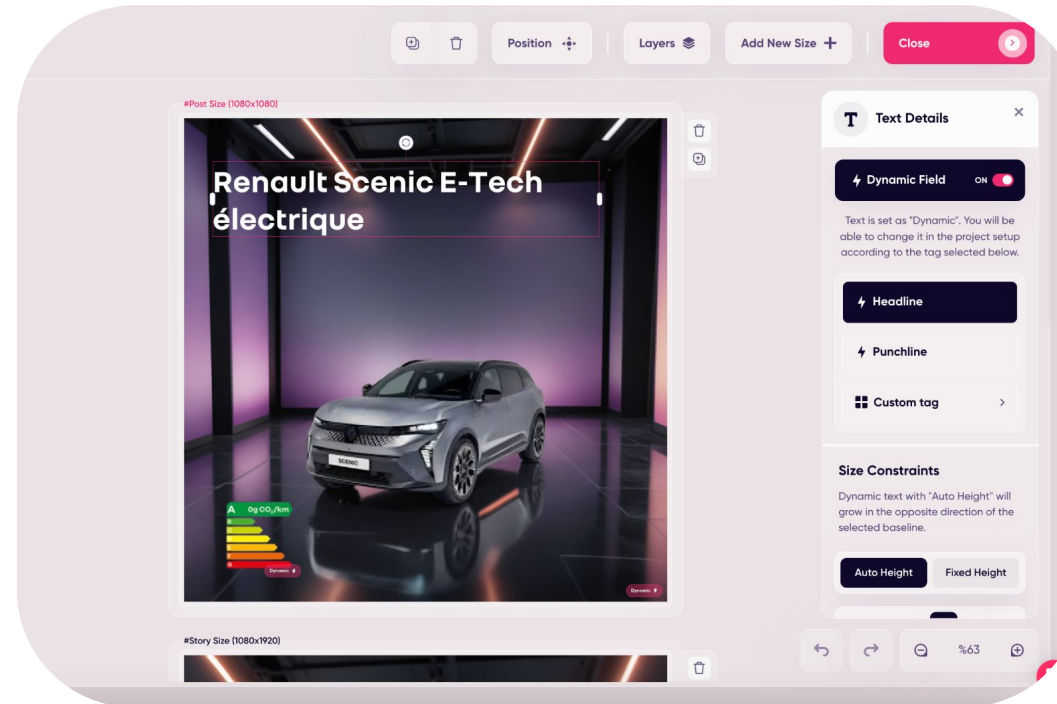

- **AI Stock Images:** generate visuals and apply your template directly
- **Fine-Tuning:** ensure image tone and layout match your brand identity
- **A/B Testing:** iterate fast with different messages on the same visual base

 **Note:** Some layout adjustments may be needed depending on image composition or cropping. Templates work best with high-quality, centered visuals for optimal alignment.

Create the image to be used as the background.

Template building

Use Stock Images feature and select the Fine Tuning option to create the model

Template usage

Select and use that template to create variations

Product Photo Ads

Turn simple product shots into polished, **high-converting visuals, without the need for costly photo shoots.**

Product Photo Ads is designed for businesses that rely on product visuals to drive performance: DTC brands, marketplaces, retailers, and even B2B companies with extensive product catalogs.

Why it fits these industries:

- ⚡ Speed: no need for physical shoots or editing rounds
- 💰 Cost-efficiency: produce ad-grade visuals without studio costs
- 🎯 Contextual relevance: place each product in a fitting, branded scene

Maximize impact by pairing with:

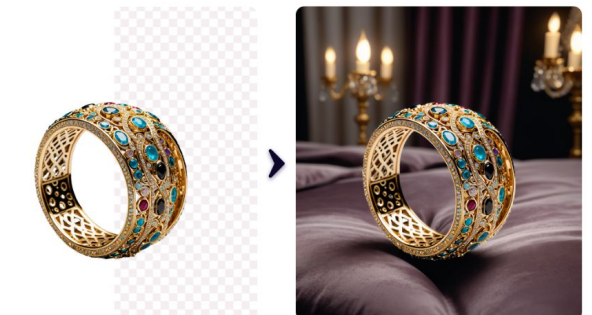

- **Template Builder:** insert your product visuals into campaign-ready layouts
- **Product Video Shoot:** turn product shots into short, motion-based ads
- **AI Video Generator:** animate your photo scenes into scroll-stopping video formats

⚠️ *Note:* Results depend on image quality and prompt clarity. In some cases, AI-generated effects may appear synthetic—careful styling helps minimize this.

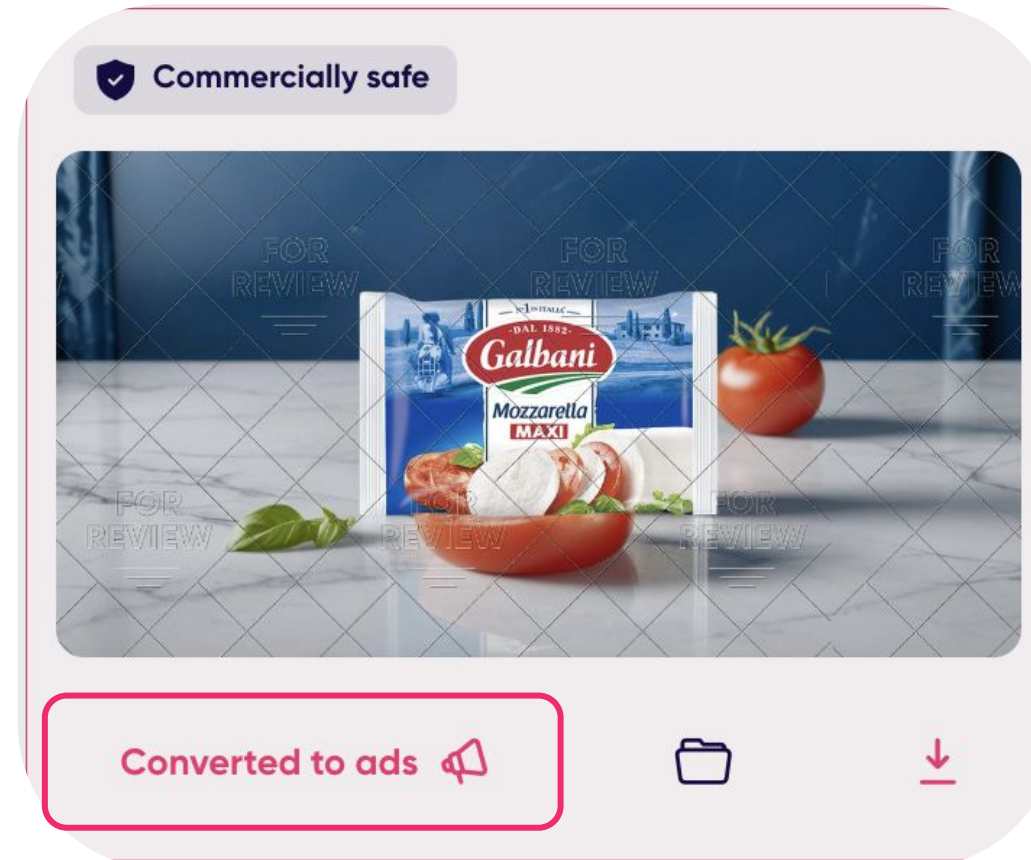

Product Photo Ads

Turn product photos into professional shoots instantly by uploading a single image

Product Photo Workflow example

Product Photoshoot

Create the image to be used as the background.

Convert to Ads

Use the convert to Ads button to generate a ready to launch creative in seconds

Automatic Ad

AI is generating Ad Copy and display it to create a ready to use ad visual

Product Videos

Turn static visuals into short, cinematic videos instantly from a single product image or visual, and without expensive production cost.

AI Product Video Generator is designed for eCommerce brands, Service companies, retailers, and B2B players looking to scale video content without video teams or production budgets.

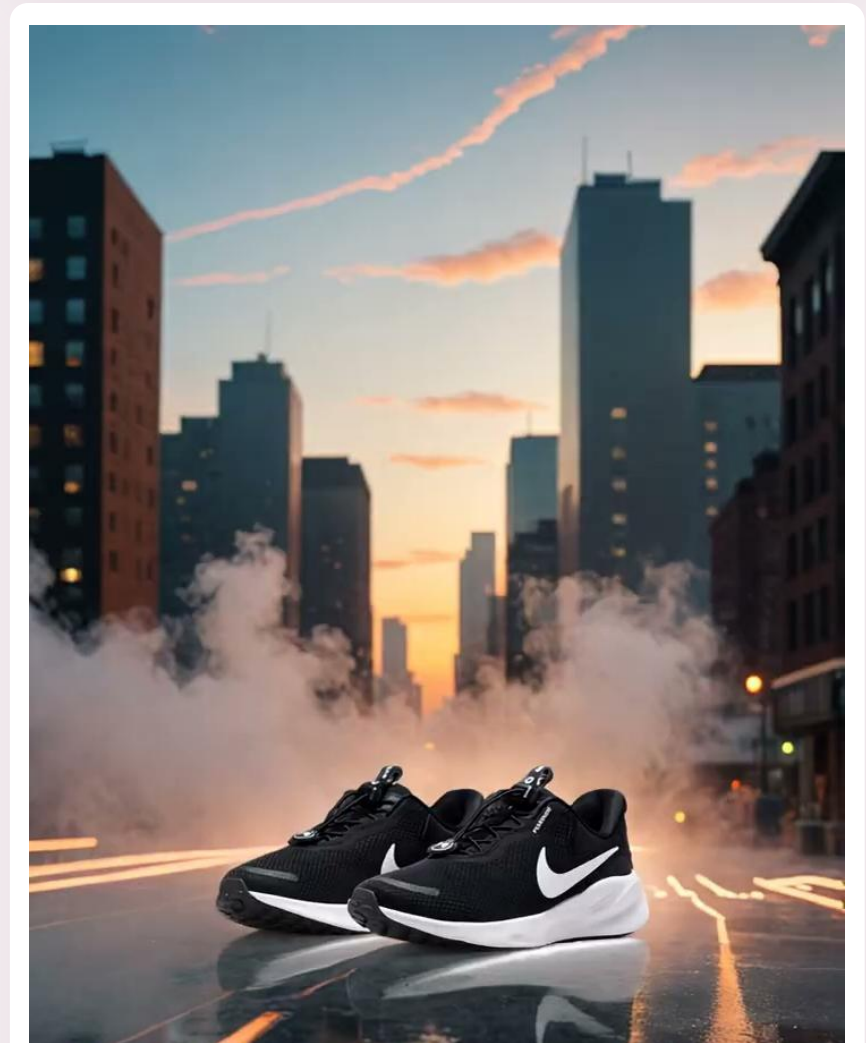

Why it fits these industries:

- ⚡ Fast, automated video creation from a single image
- 🎯 Visually on-brand and adapted to your product category
- 💰 Cuts costs compared to traditional shooting setups

Maximize impact by pairing with:

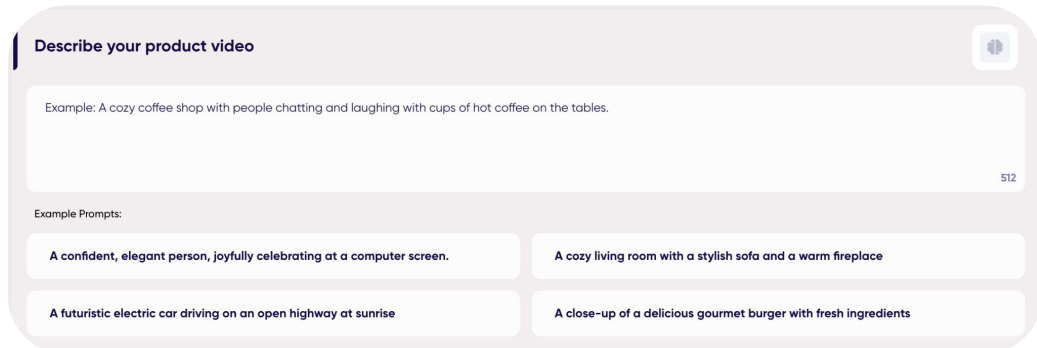

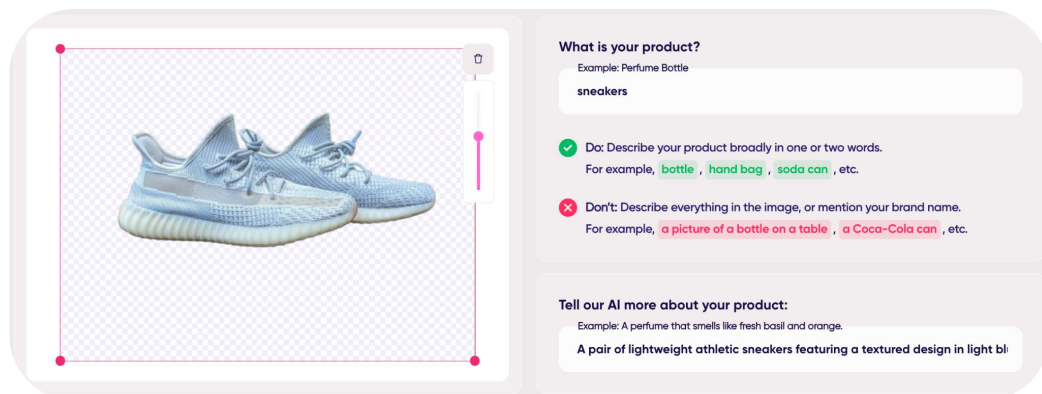

- **Template Builder:** insert generated videos into campaign layouts
- **Stock Images & Product Photo Ads:** create the visuals you'll animate
- **Product VideoShoot:** build short-format motion ads at scale

⚠ *Note:* Video outputs are short (5–10 seconds). For longer content, generate multiple scenes and assemble them into a sequence. Styling, prompt quality, and image composition heavily influence final results.

Your Product is integrated in a real life scene

AI Stock Video Generator

Create stunning, motion-rich short-form video loops.. Just **type your brief** and get license-free, **brand-safe videos in seconds**.

AI Stock Video Generator is designed for Retail, Services, Ecommerce, Fashion, and FMCG, where fresh, engaging video content is key to staying competitive.

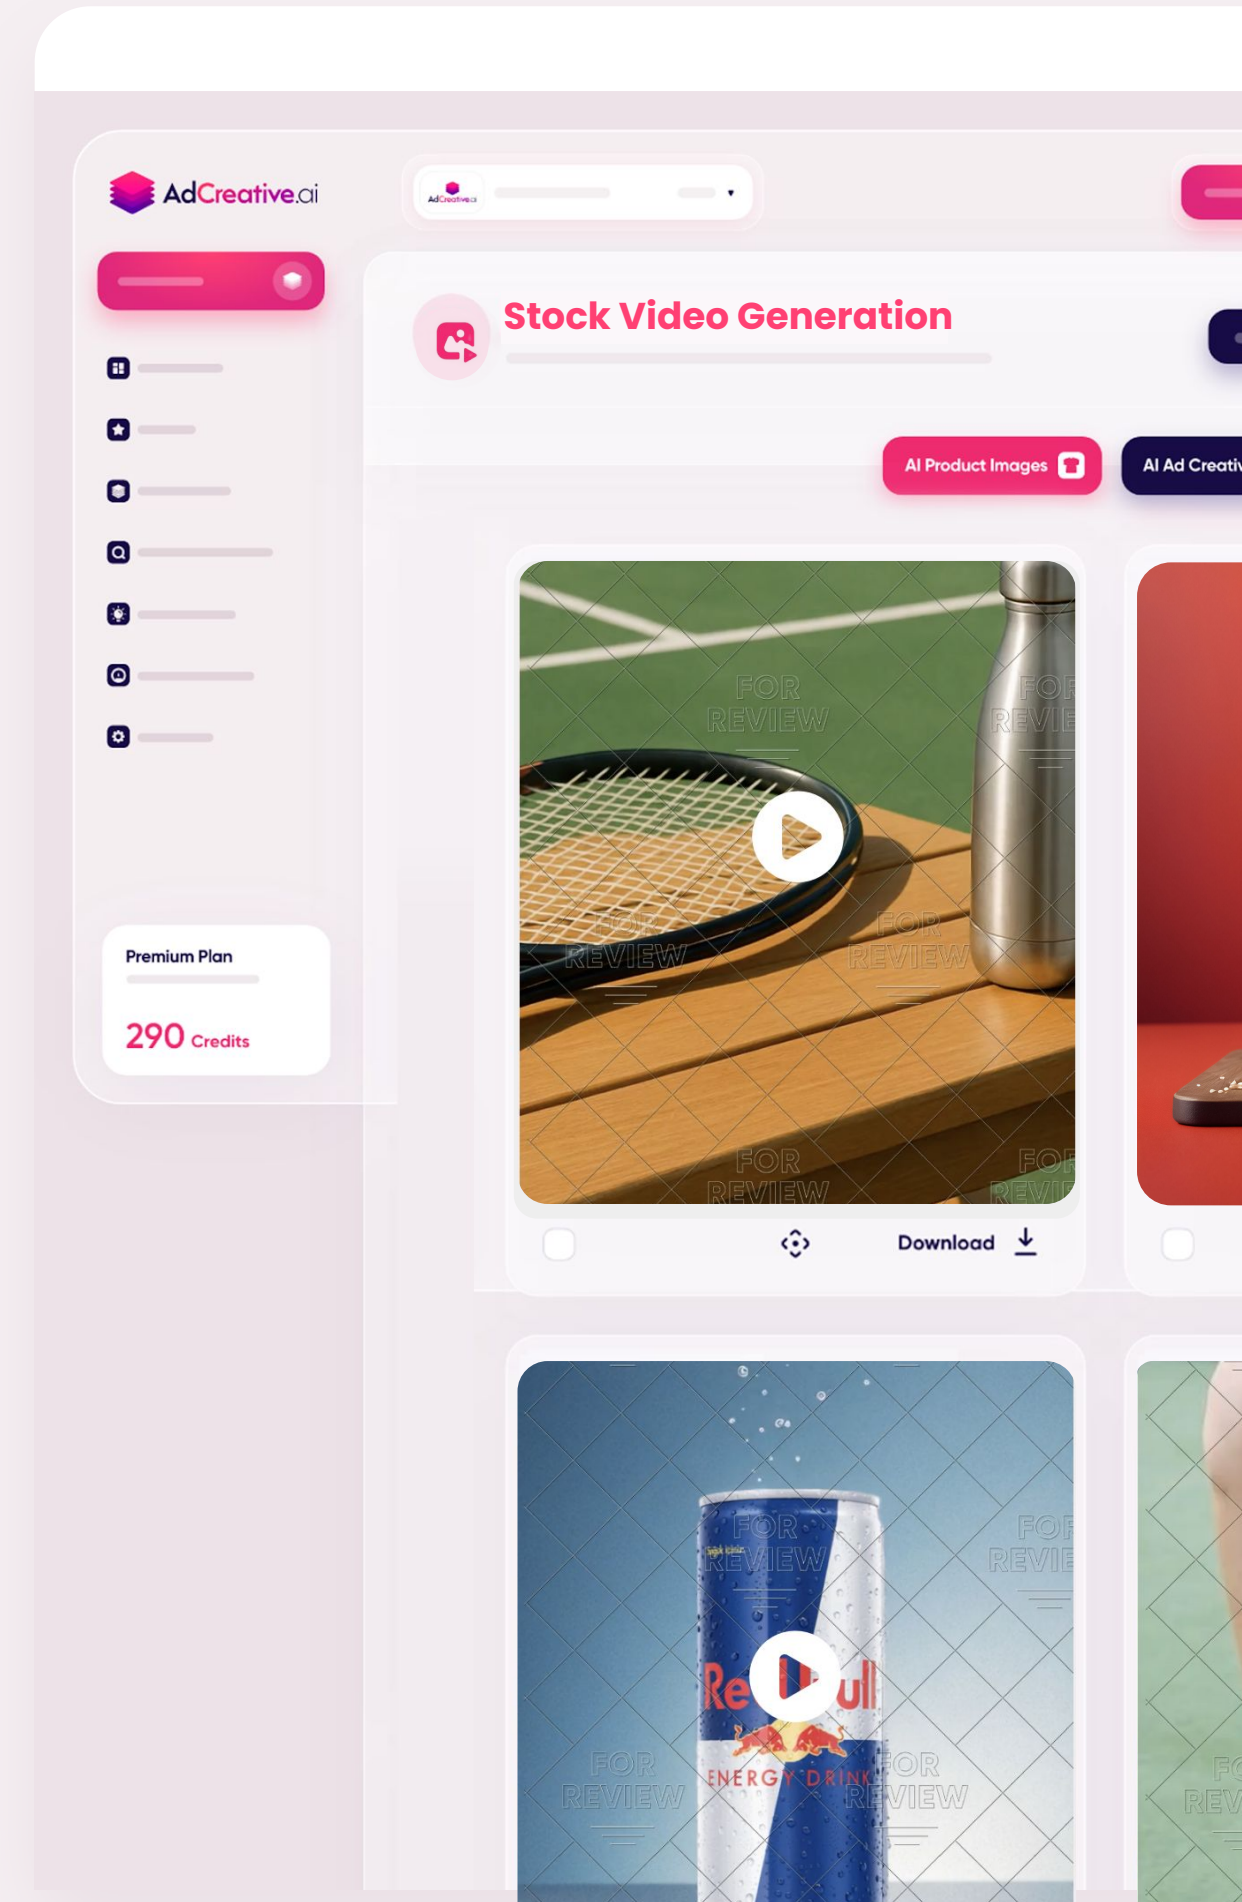

Why it fits these industries:

- 📱 High demand for visual content across social and advertising platforms
- ⌚ Traditional production is slow and costly
- 🚀 Scalable AI videos deliver fast, high-quality, branded results

Maximize Impact with These Features

- **Fine Tuning:** Align motion visuals to brand-specific aesthetics or seasonal campaigns
- **Stock Image Generator:** Blend static and motion assets for multichannel campaigns
- **Custom Templates:** Add structure, CTAs, and messaging for ad-ready output

⚠️ *Note:* Currently, assembling longer-form videos must be done outside AdCreative. However, our integrated video studio is coming by end of Q3, enabling a full creation-to-delivery pipeline in one place.

Demo

Image + Text to Video

Combine an image and text to generate a video.

Image + Text to Video

Example: A barista carefully pours hot water
car beams are flashing

Stock Video

Image + Text allow you to generate a video from a static image

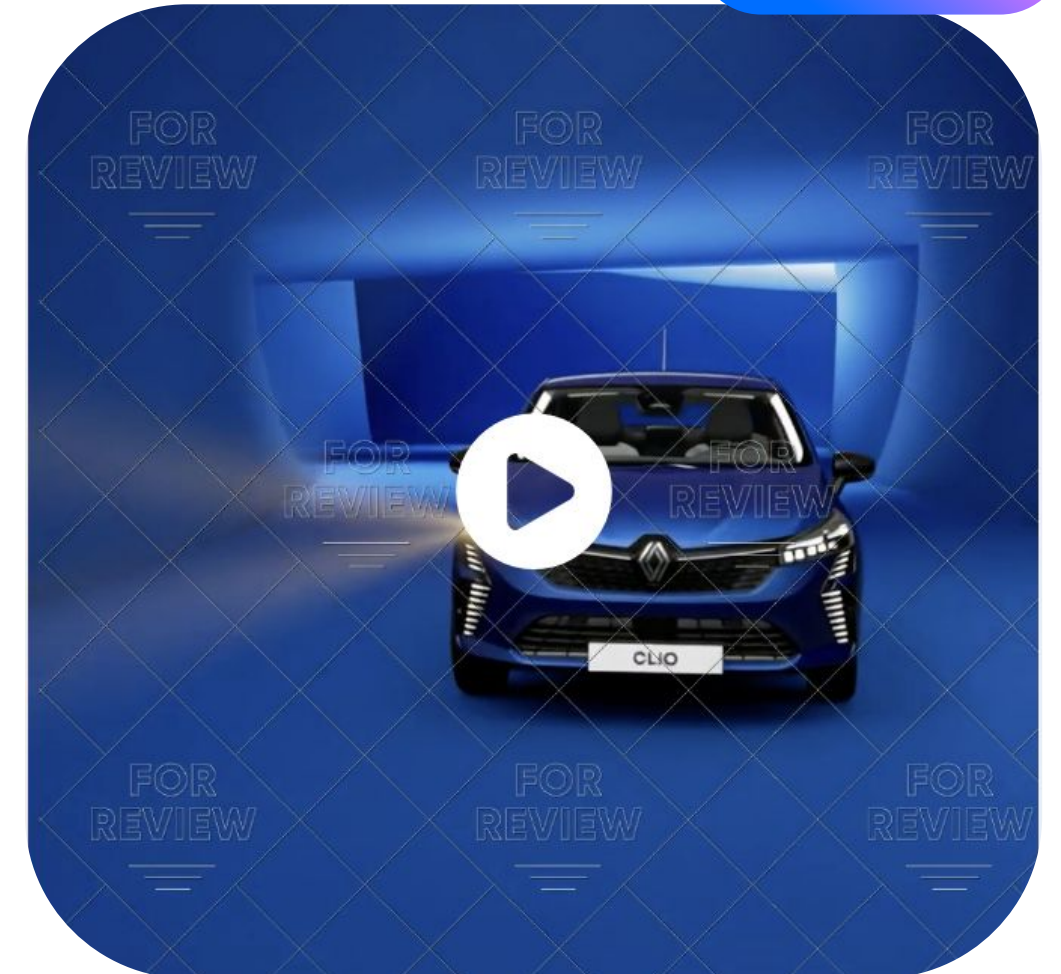

Stock Video

Use prompts to create a style fitting the best your needs for your campaign

Stock Video

The image is animated in the way you've asked in your prompt

Competitor Insights AI

Instantly analyze a rival's digital footprint and their **top-performing ads**, **traffic sources**, **geographic reach**, and **device breakdowns** in one view.

Competitor's insight is built for Data-Driven Industries: Ecommerce, Retail Services, and **FMCG**, where ad performance, competitive pressure, and strategic planning are key.

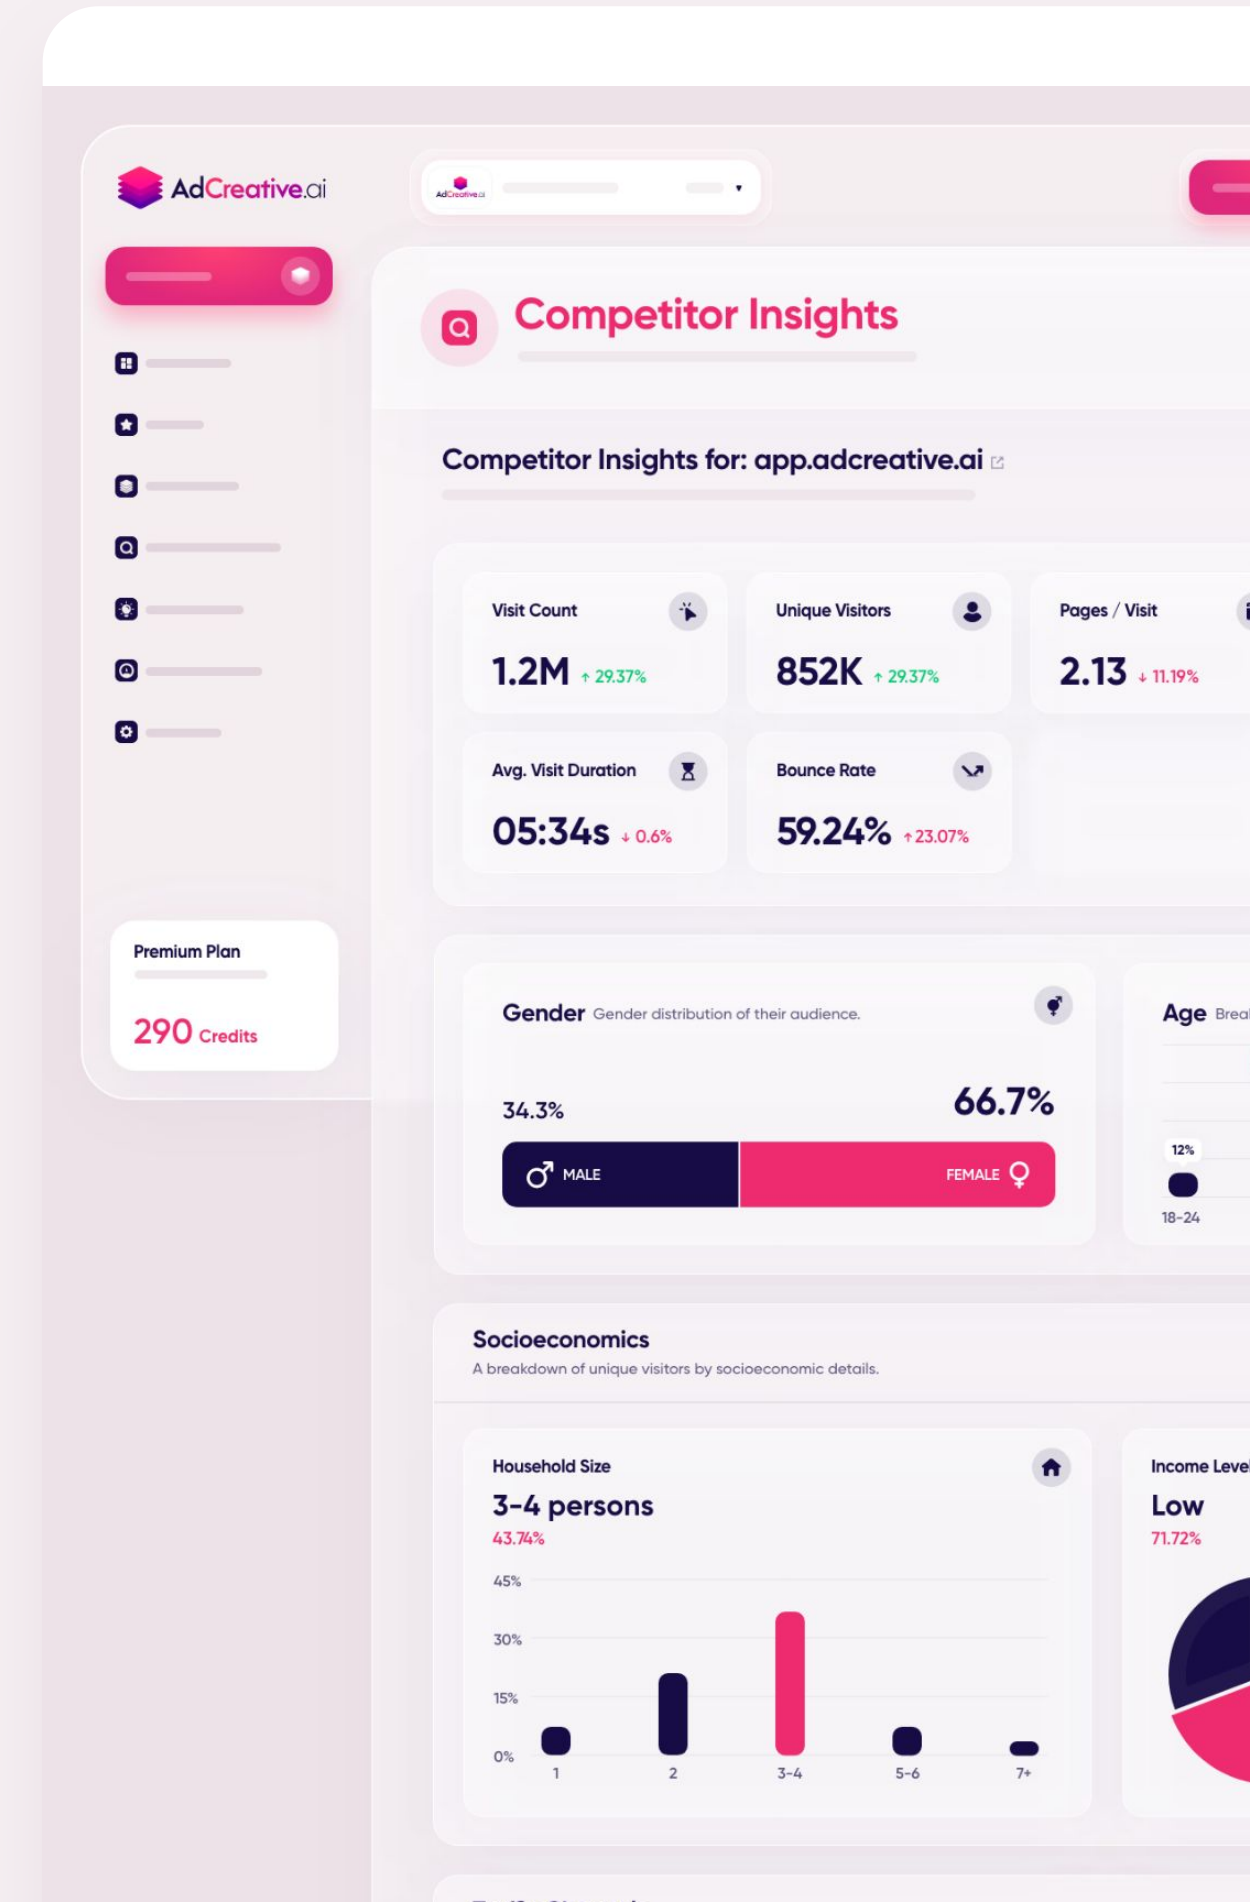

Why it fits these industries:

-  Constant need to benchmark and stay competitive
-  Reveals how competitors capture attention and drive conversions
-  Informs smarter strategy, creative choices, and budget planning

Maximize Impact with these features:

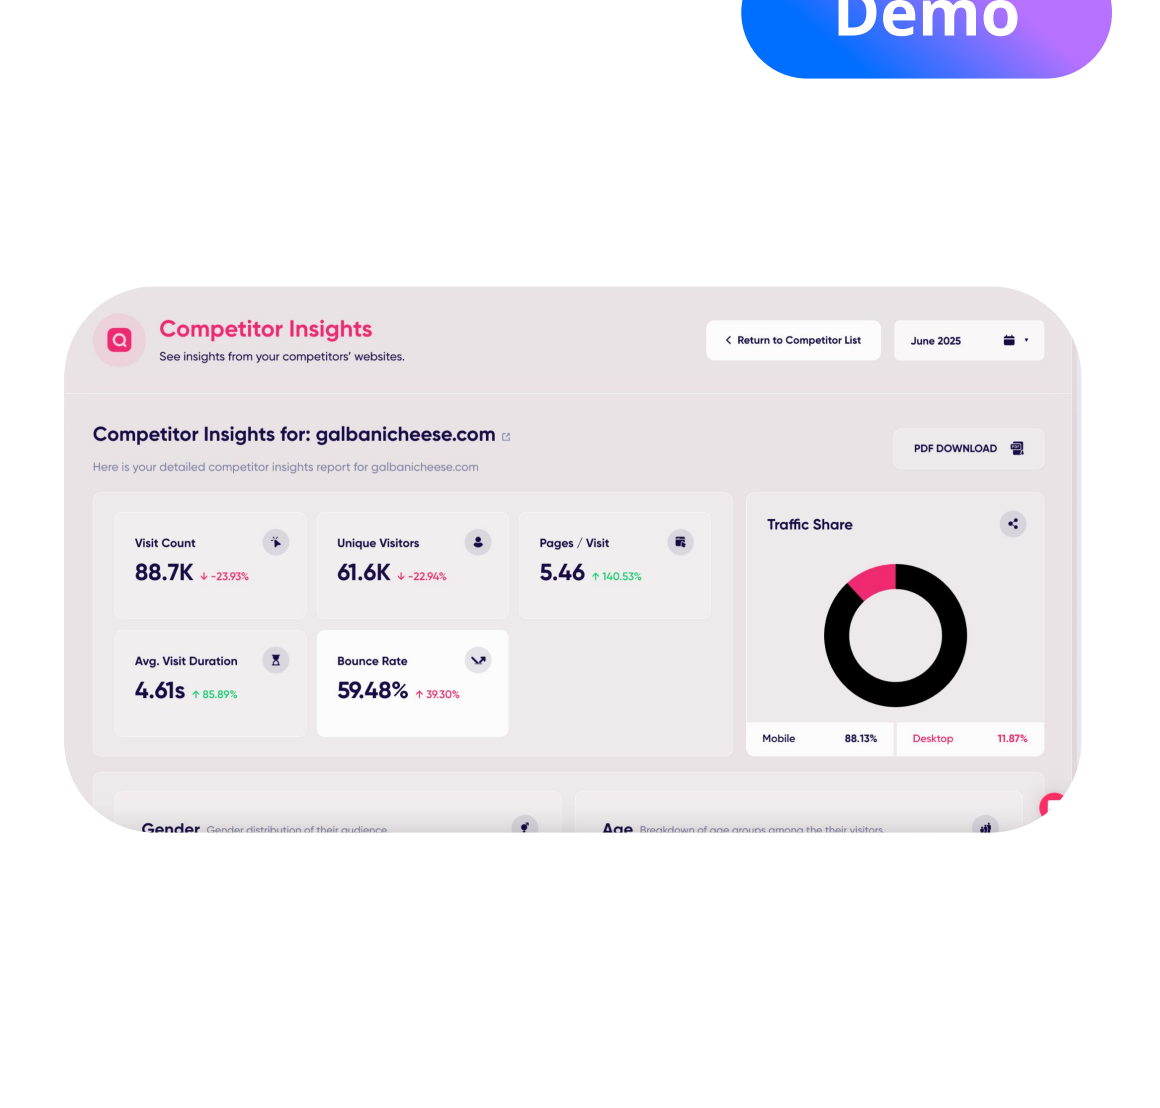

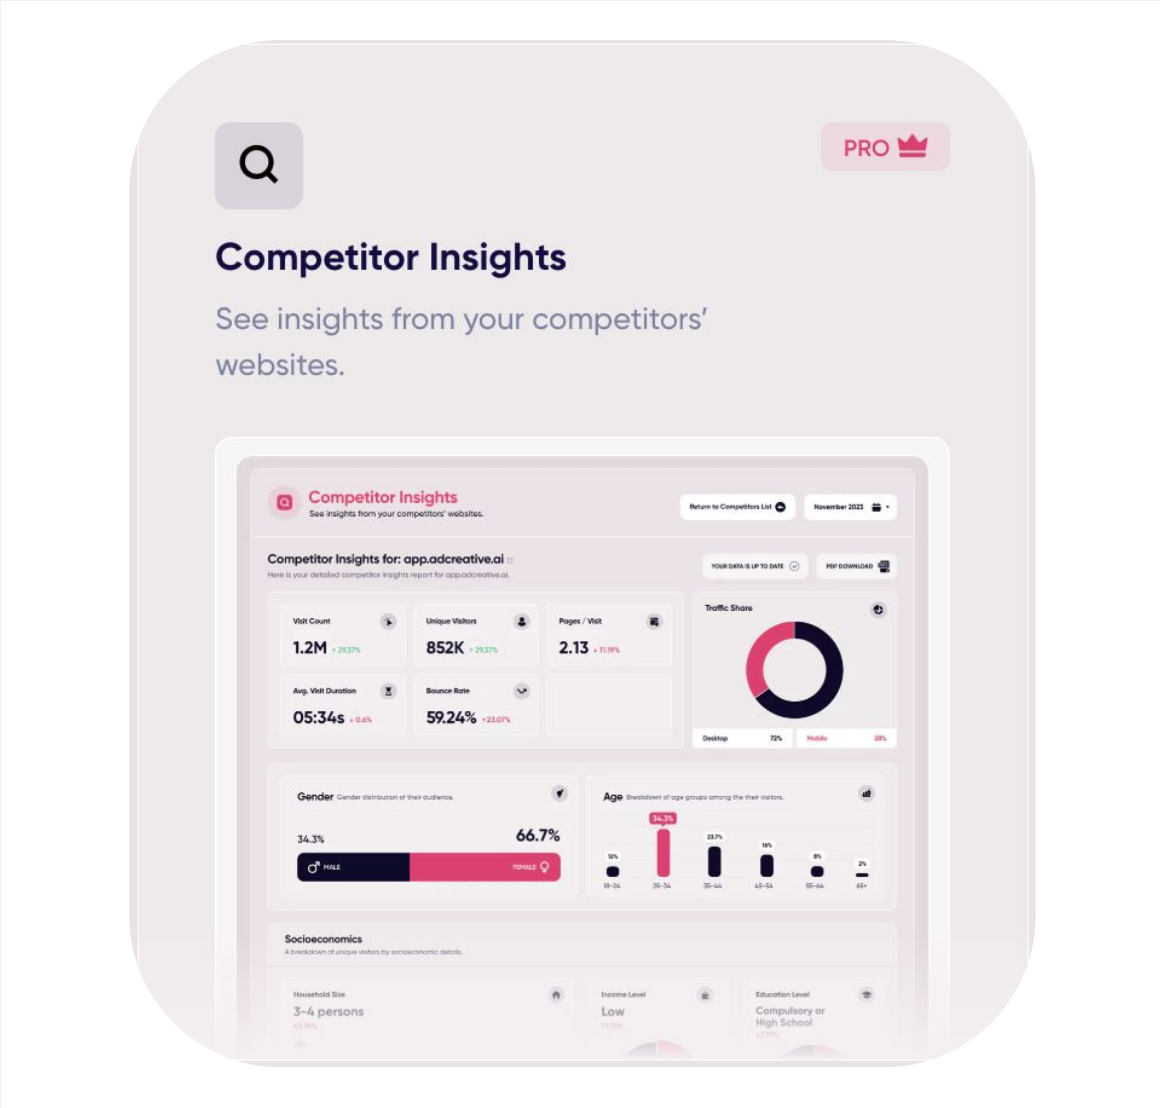

- **Buyer Personae:** Match competitor strategies to your ideal segments
- **Predictive Scoring:** Prioritize campaigns based on likelihood of success

 **Note:** Data is based on cookie collection, so accuracy may vary, App traffic is not tracked and Data refreshes monthly, not real-time

Creative Scoring AI

Evaluate your ad creatives before launch using over **450 predictive data points**, giving you confidence and clear direction to improve performance before committing media budget.

Built for Fast-Moving Consumer Sectors Ideal for **Ecommerce, Retail, Services, and FMCG**, where optimizing return on ad spend and reducing waste is critical.

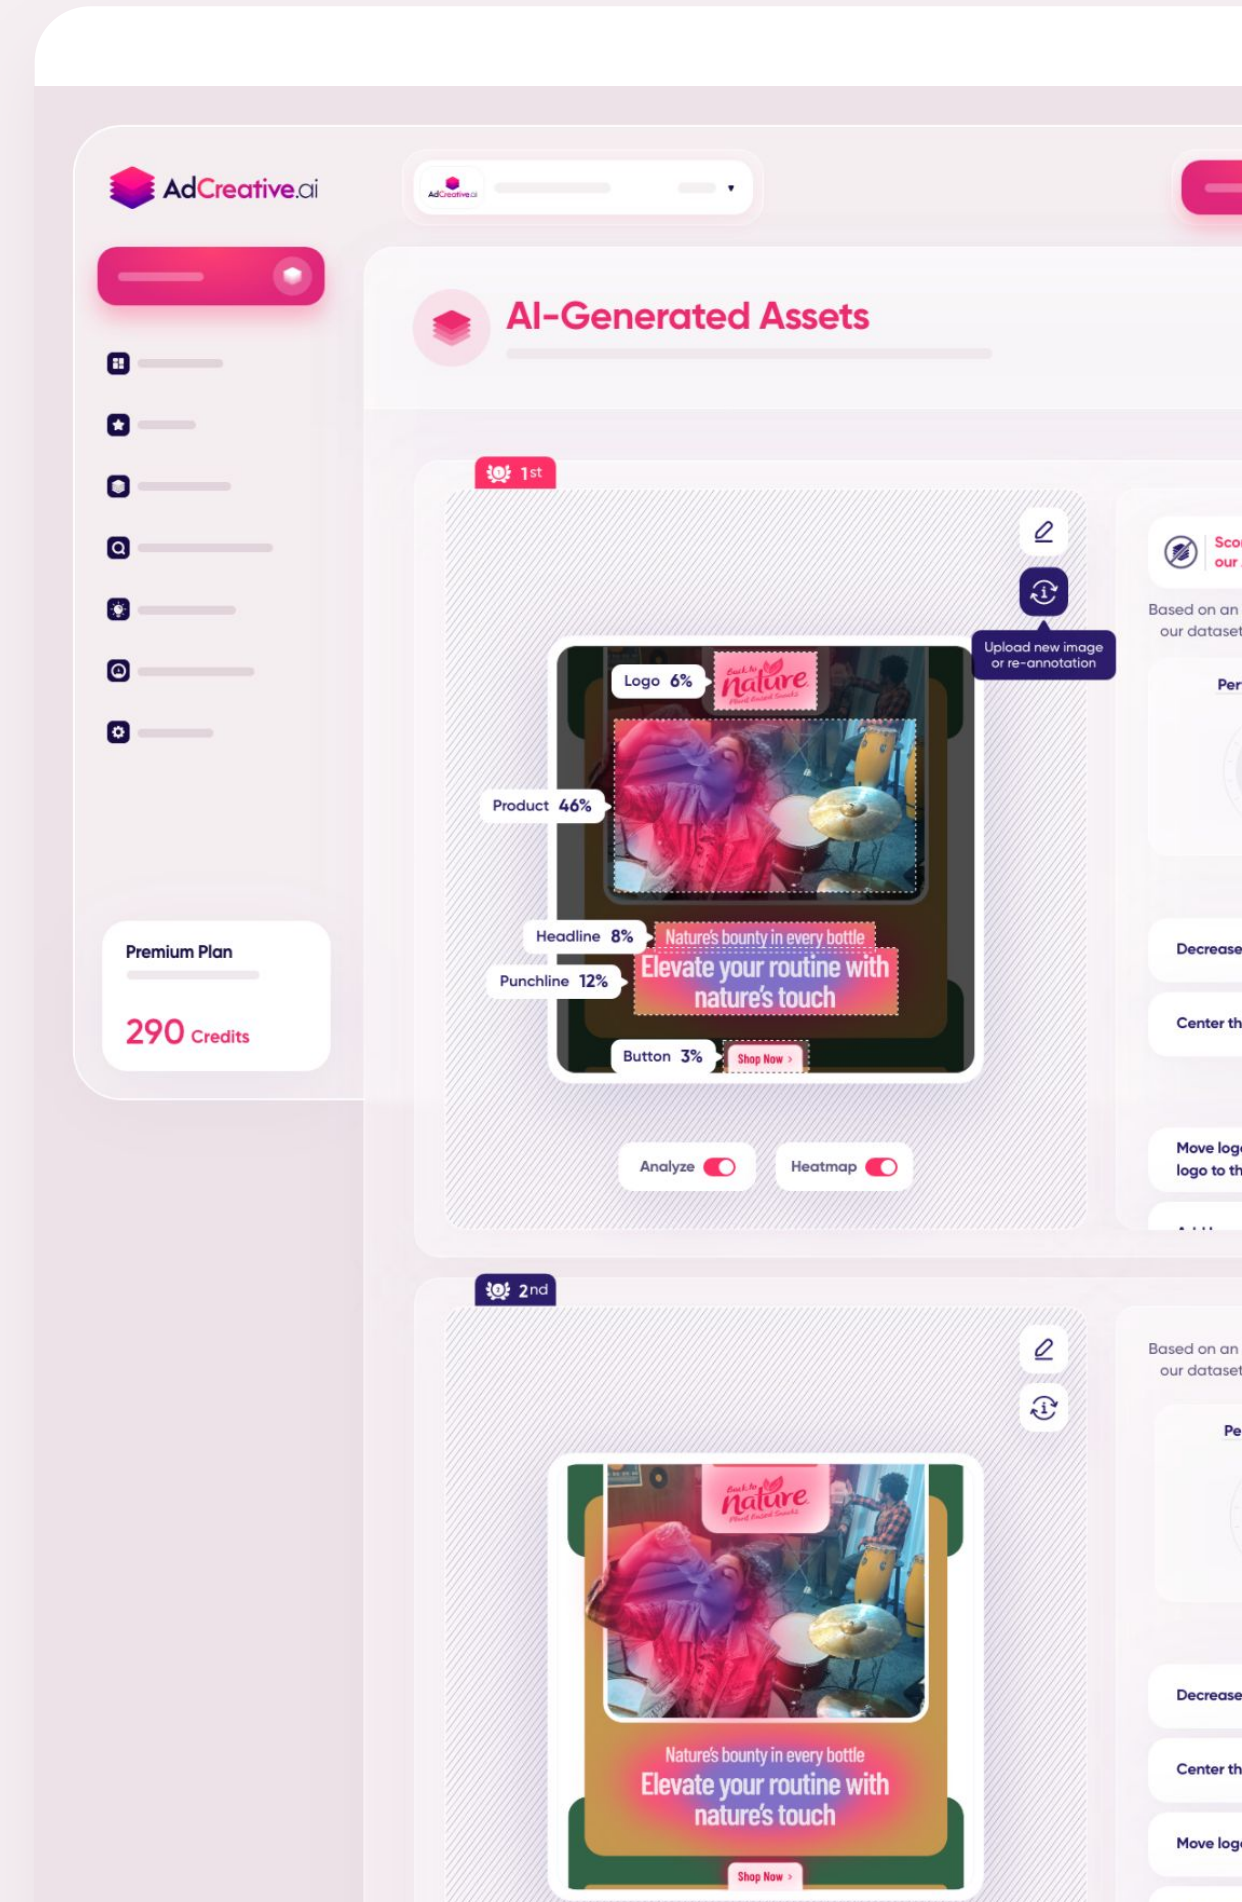

Why it fits these industries:

- 📣 High campaign volume across multiple channels
- ⚠️ Underperforming creatives are costly and risky
- 📈 Creative Scoring AI boosts content success with predictive insights before A/B testing

Maximize Impact with These Tools

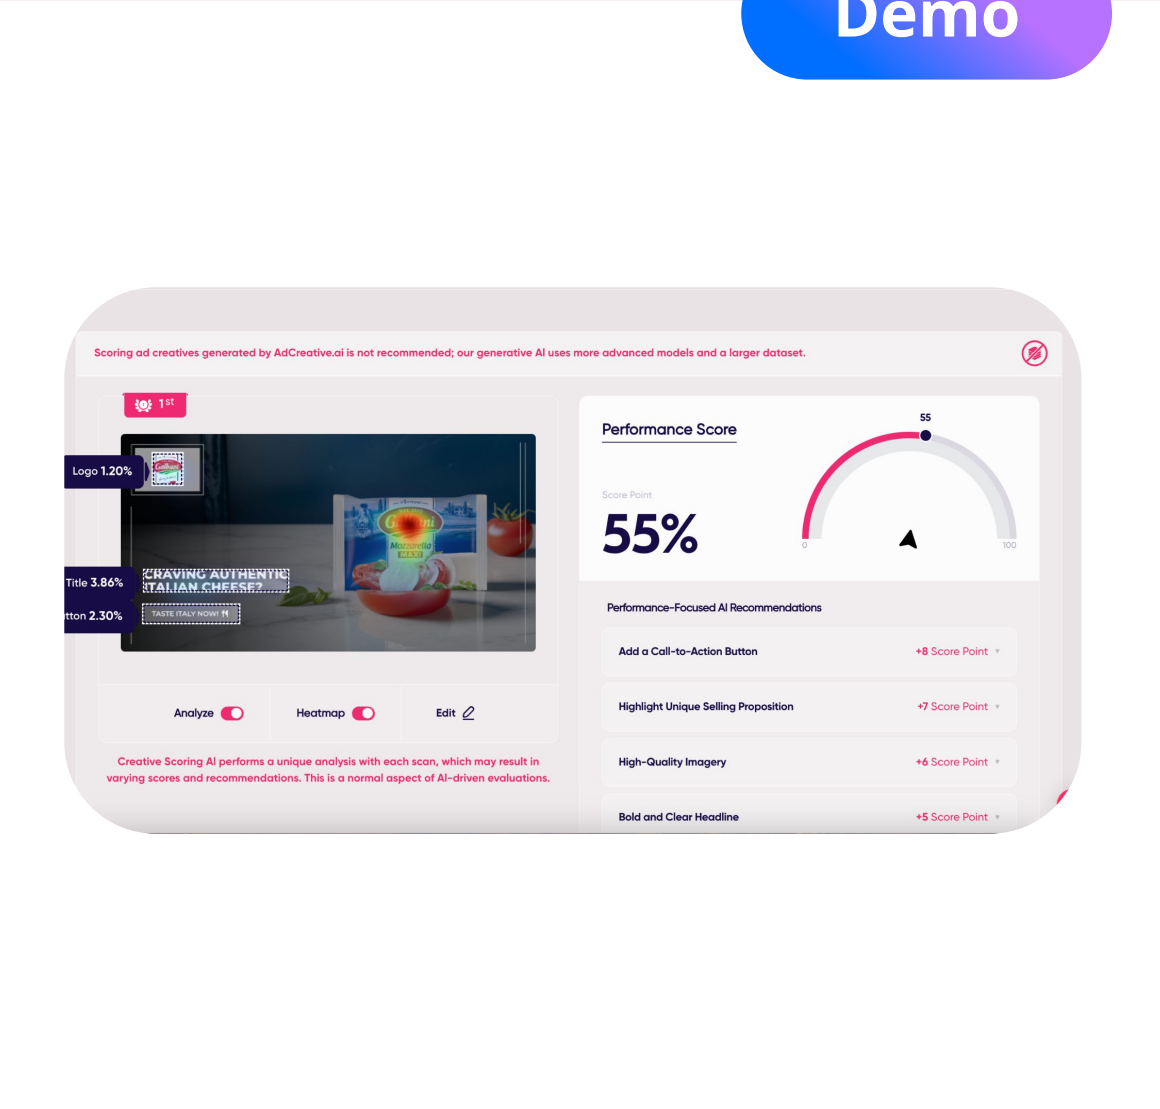

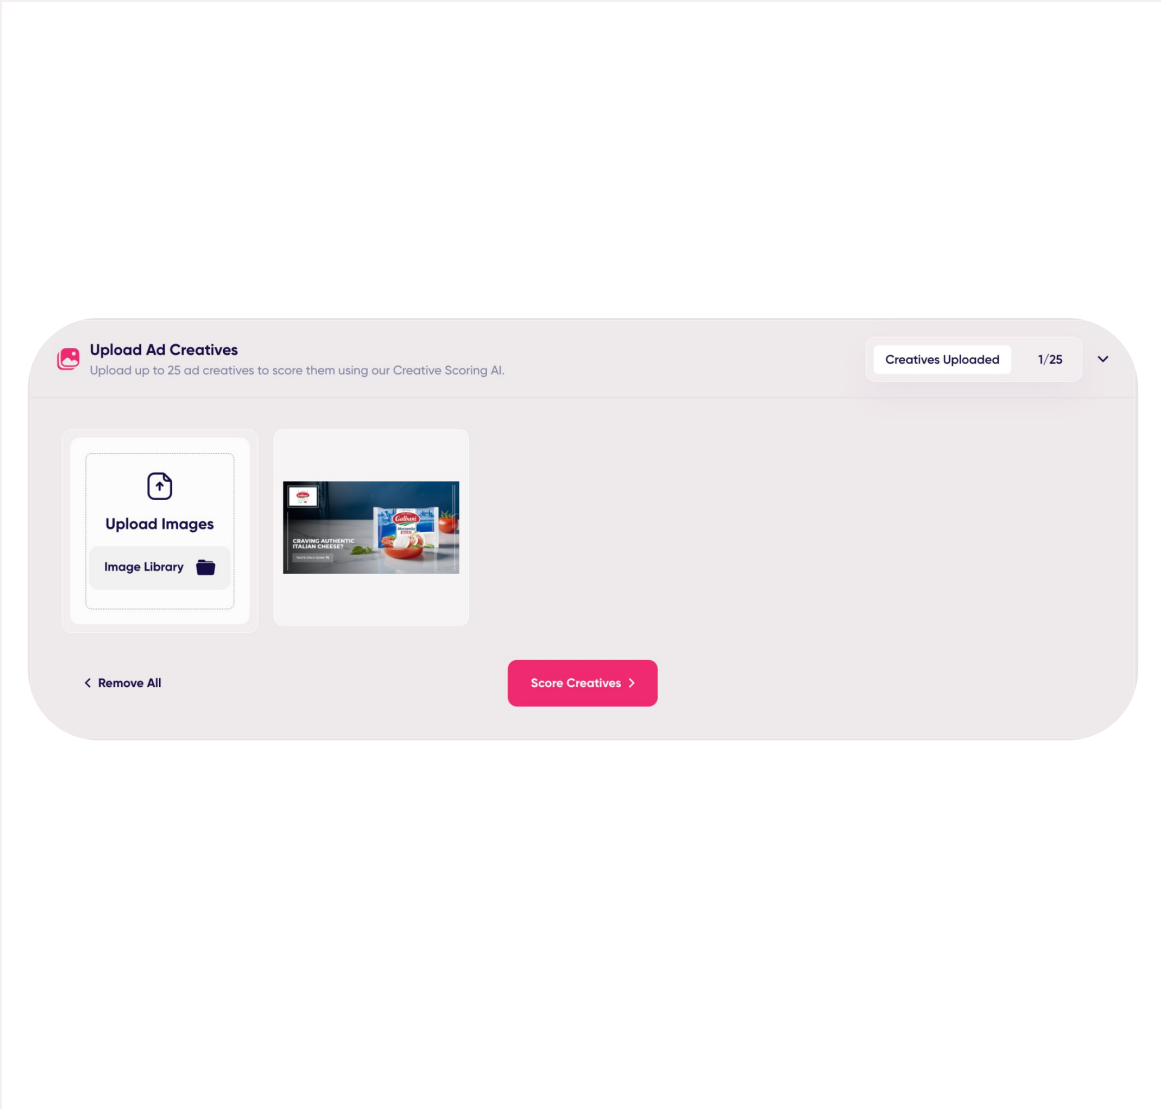

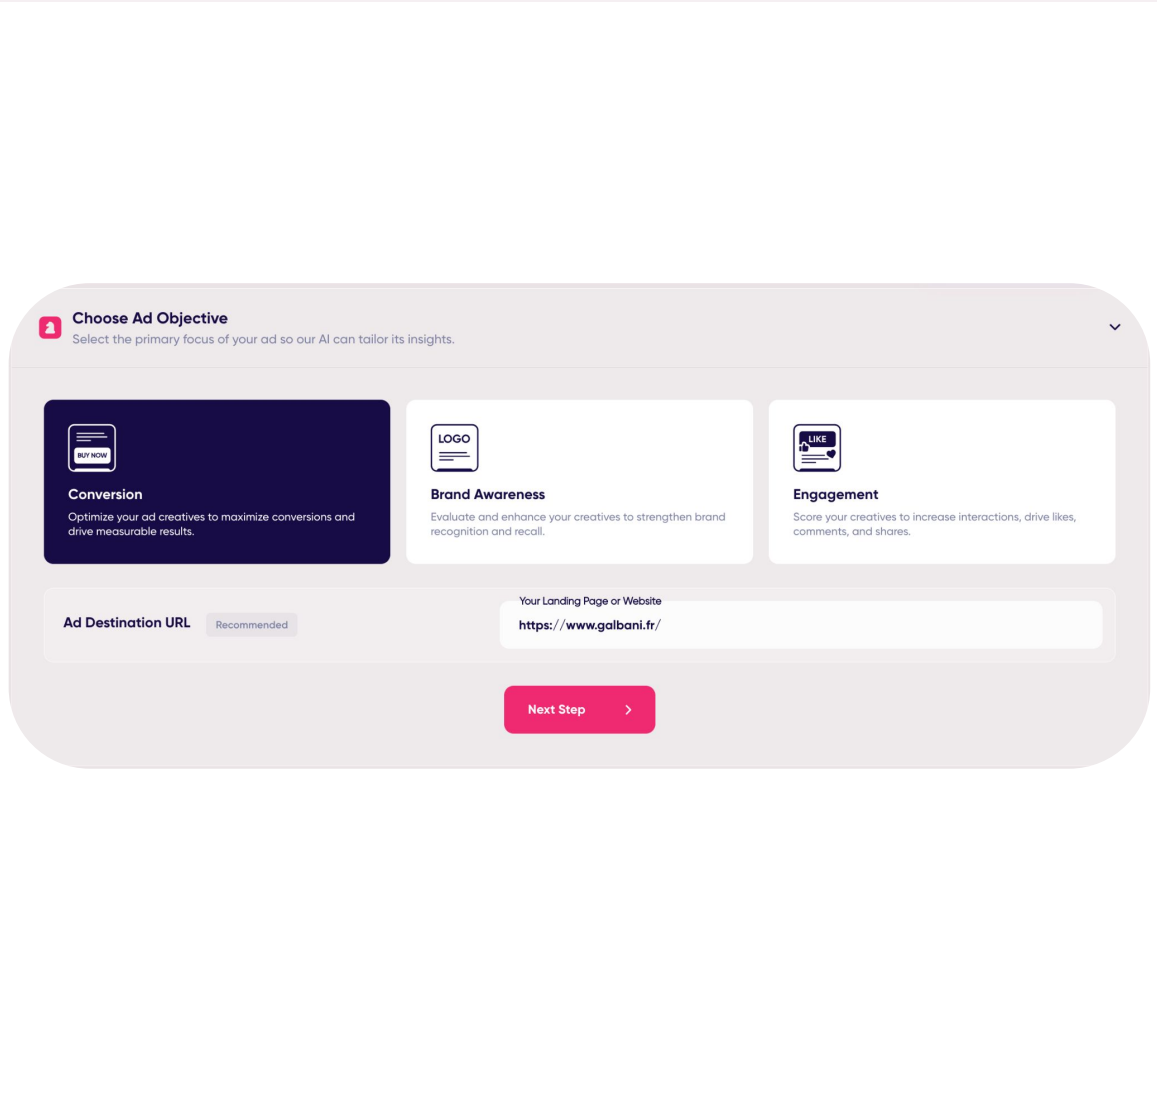

- **Custom Templates** – Quickly test creative variations at scale
- **AIRIS Buyer Personae** – Align visuals with segment-specific preferences
- **Brand Fine Tuning** – Ensure scoring is guided by your brand's creative standards

⚠️ **Note:** Scoring delivers **data-backed predictions**, not performance guarantees
Effectiveness depends on **input quality** and **brand guideline alignment**

Compliance Checker

Instantly verify whether your ad creatives meet critical standards across platforms, brand guidelines, and international legal frameworks, reducing risks before they go live.

Designed for High-Stakes Industries and Global Brands, as well as **regulated sectors like Finance and Pharma**, where compliance failures can lead to brand damage, rejections, or legal exposure.

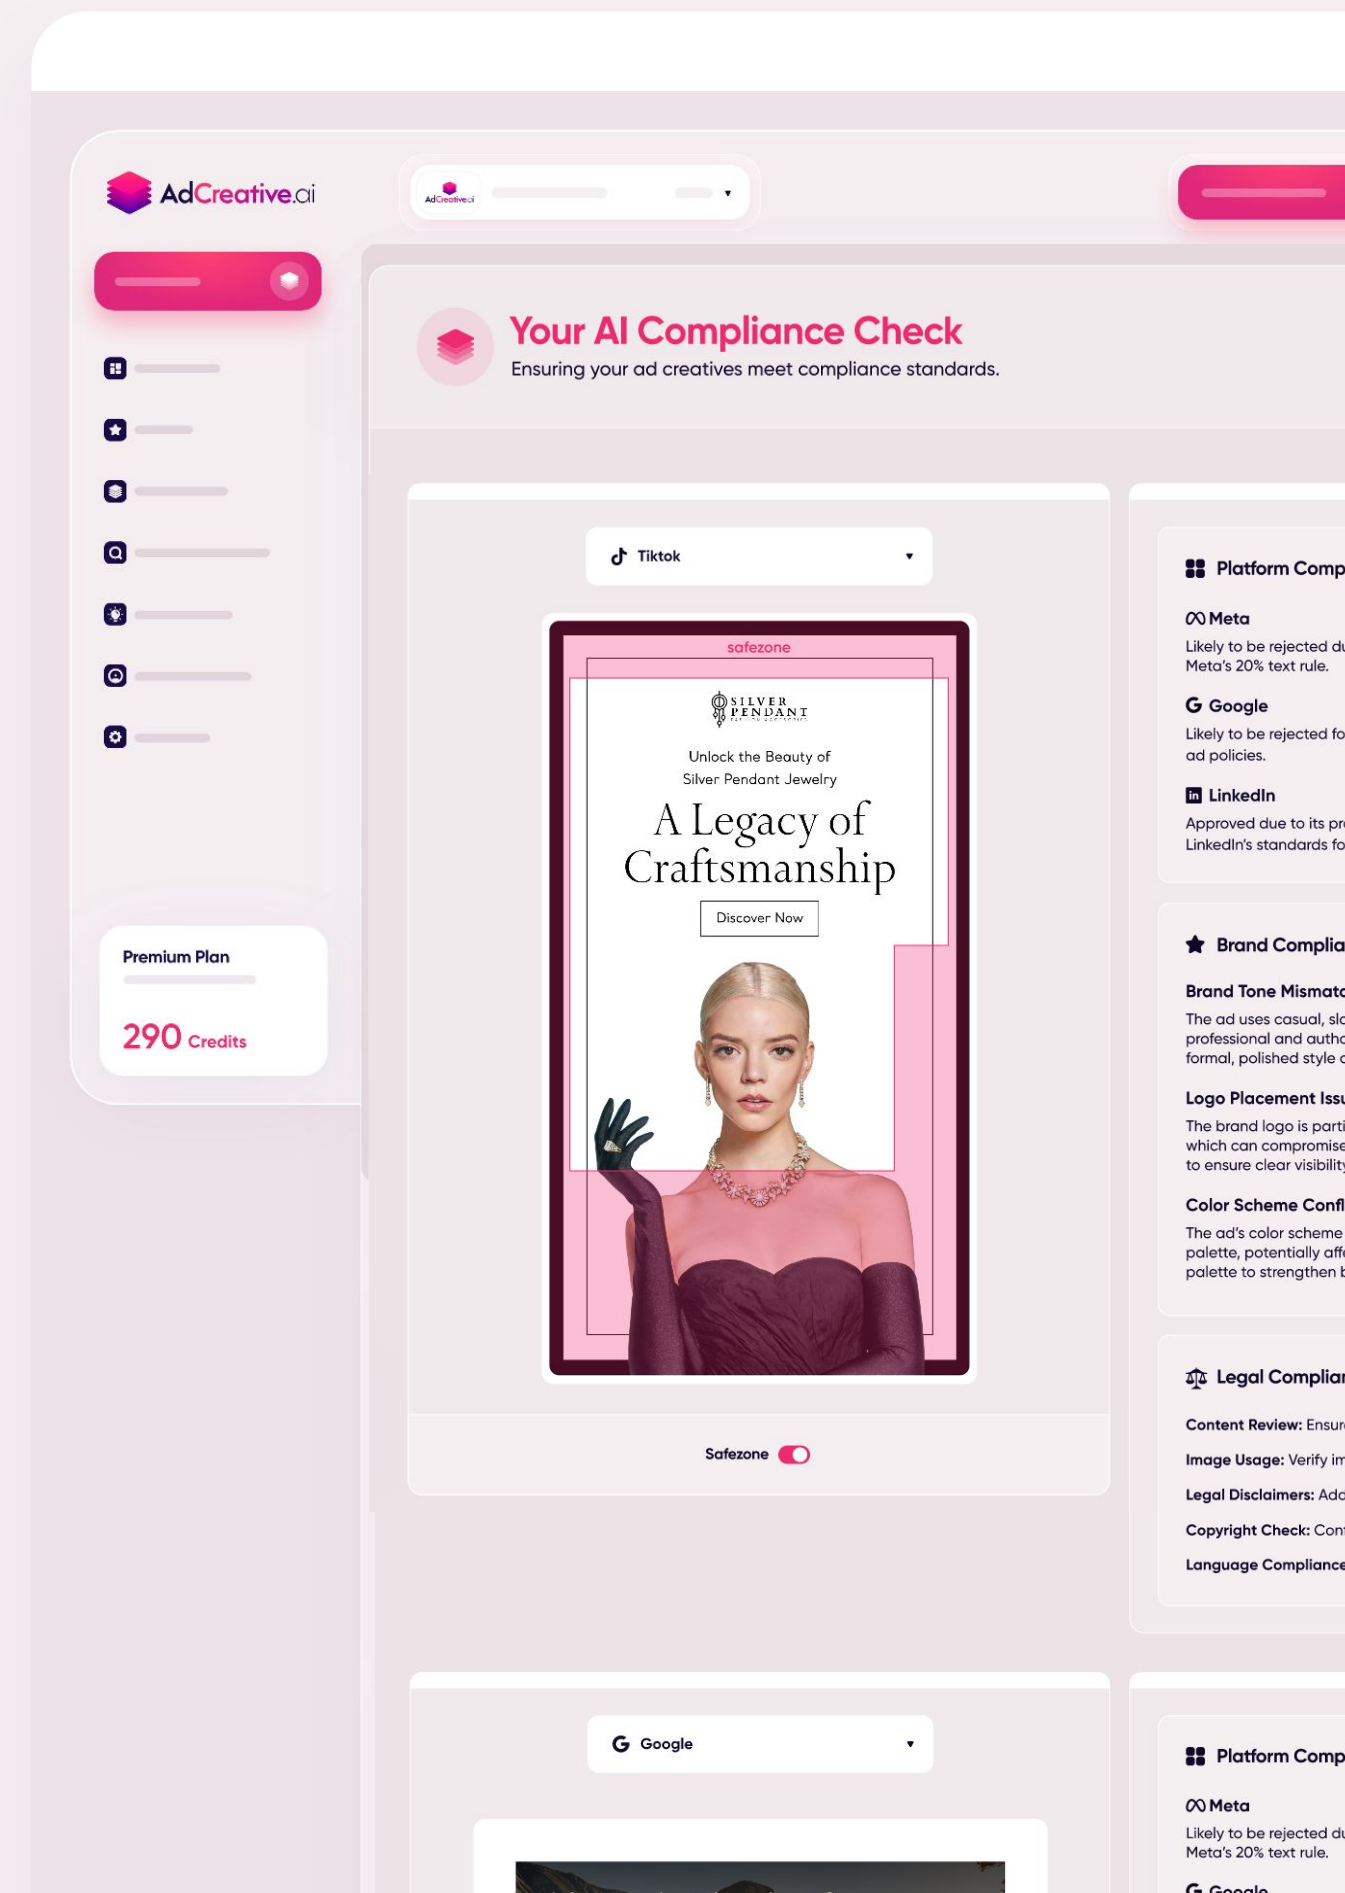

Why it fits these industries:

-  Operate under strict creative and brand controls
-  Adapt content confidently across tests, scales, and markets
-  Compliance Checker ensures brand safety and regulatory alignment

Maximize Impact with These Tools:

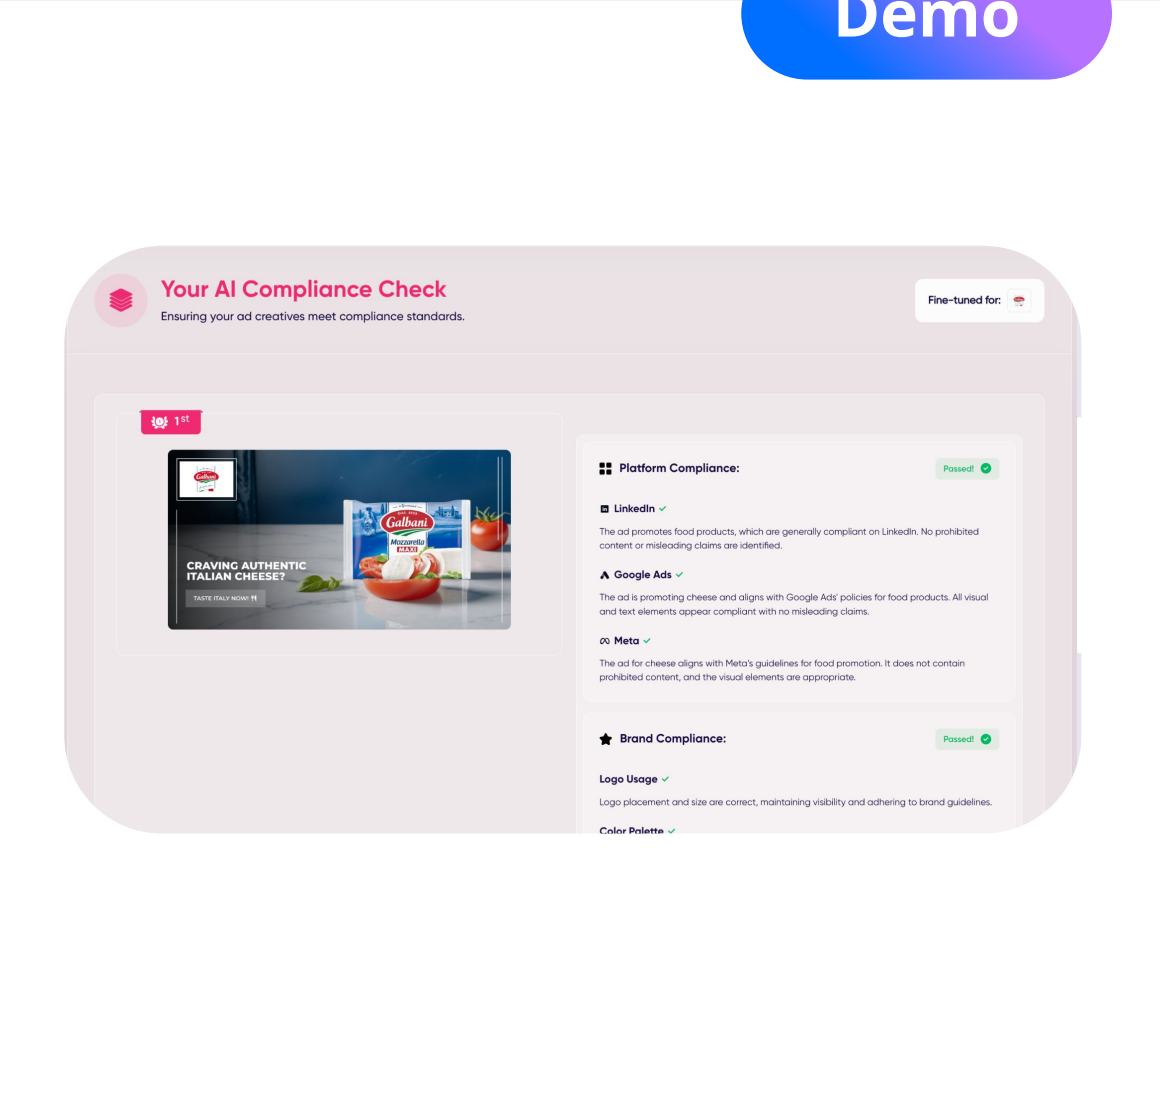

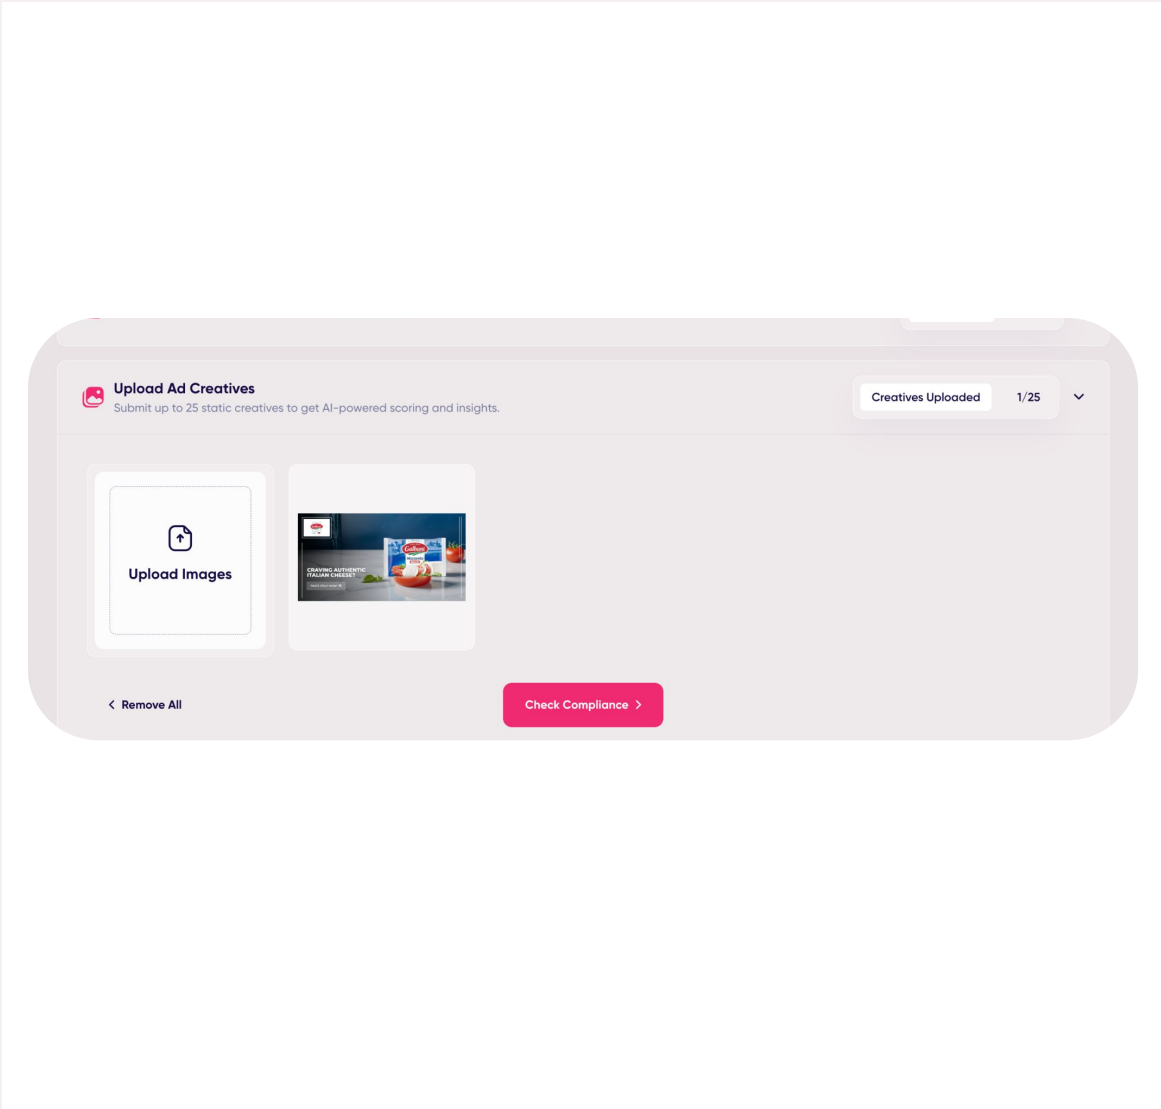

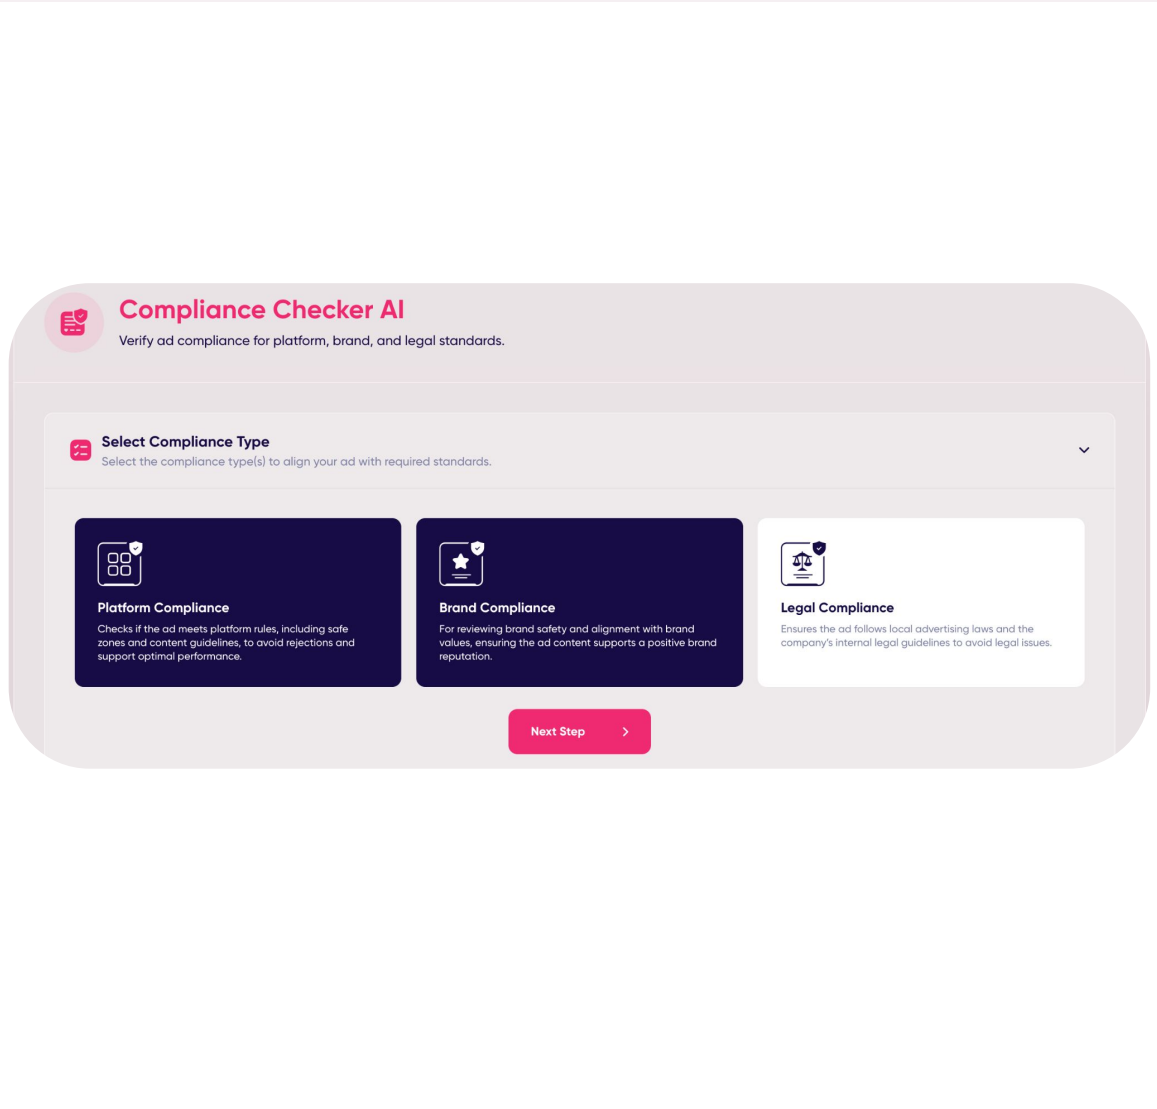

- **Creative Scoring AI** – Pre-check performance and compliance in one workflow
- **Templates** – Ensure structured outputs stay within policy
- **Brand Fine-Tuning** – Automate brand alignment across teams

 **Note:** Compliance outcomes depend on current platform rules and brand guideline. Legal guidance may vary with evolving regulations, and this feature is not a substitute for professional legal review
